DETAILED ACTION

Allowable Subject Matter

Claims 19-35 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 19 and 28, the prior art in Asmussen et al. (US 2,142,072) teaches a lamp comprising a hollow light transmitting body having a neck having external threads and a keyway. Asmussen does not teach a base locking ring disposed around the neck of the bulb. Zhu (US 5,521,460) teaches a locking clip that has a projection that is bent over the lamp base shell and welded to secure the lamp base but fails to teach the clip in the form of a ring. Fowler (US 1,049,070) teaches a locking clip in the shape of a ring. However, the bulb of the lamp taught by Fowler does not have a threaded neck. Consequently, one of ordinary skill in the art would not have been motivated to combine the teachings.

Prior art fails to disclose or fairly suggest:

- A locking ring having an indentation that fits in a keyway of the lamps neck and a projection that is bent over and secured to the lamp base shell, in combination with the remaining claimed limitations as called for in claims 19 and 28 (claims 20-26 and 29-33 are allowable for the same reasons since they are dependent on claims 19 and 28, respectively);
- A lamp base shell apparatus including a locking ring being rotatively connected to lamp base shell, in combination with the remaining claimed limitations as called for in claims 27, 34, and 35. Such an assembly allows the locking ring to be attached to the lamp base shell before the lamp base shell is connected to the lamp simplifying the manufacturing process.
